Inline Classes

```kotlin
@JvmInline
value class Iban(private val value: String) {
    init {
        require(value.matches("""[A-Z]{2}\d{2}[A-Z]{4}\d{16}""".toRegex()))
    }

    operator fun invoke(): String = value
}

val iban = Iban("RO10TRUE1234567812345678")
val ibanValue = iban()
```
